

INSTALLATION INSTRUCTIONS --- 19" Cantilevered Rack Shelf

Fig. 1

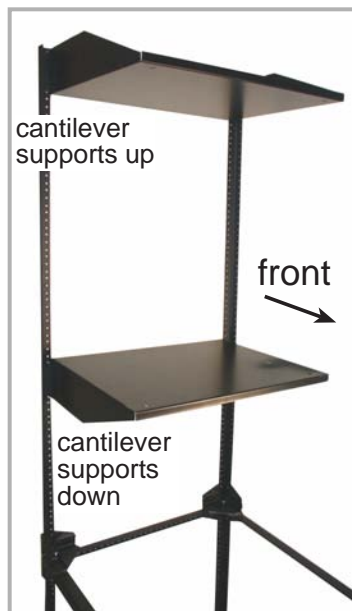

RFSHELF19 – Shelf Installation

This Rack is extremely versatile. The 19" SHELF can be installed in any industry standard 19" equipment racks and can be used to hold additional non-rackable components.

The RFSHELF19 has 14-1/2" useable depth with cantilever-designed supports. 2 rack units (3-1/2") of rack space is needed for installation. Each shelf comes complete with 10-32 screws (2 per side), which are used to fasten to the rack rails, see (Fig. 3). These shelves can be installed either as shown in Fig. 1 with cantilever supports above the shelf, or as shown in Fig. 4 with the cantilever supports below the shelf.

Computer LAN (Local Area Network) Station - Shelf installation

Fig. 2

We also offer our standard LAN Station, RFLANSTATION20.

2 shelves are included in the Extension Rail Package DX of each LAN Station; see (Fig. 2 & Fig. 5).

When installing shelves on the LAN Station Extension Rails attach from the rear of the extension rails and with cantilever supports above or below the shelf (see Fig 2 & Fig. 5). (2) 19" shelves are included with the RFLANSTATION20.
