All Star Case "Types" (with the exception of Star Light) are constructed of premium grade plywood walls with a tough fiberglass outer laminate.

All case walls are bonded with proprietary double-walled aluminum extrusions.

Case closure (except our telescoping lid design Expo Star line) is by means of proprietary, positive-fitting, aluminum tongue & groove valance extrusions.

All Star Case "Types" incorporate extrusions and hardware that coordinate properly with the case plywood wall thickness.

All case types except Star Light are available in 10 color choices: red, white, blue, green, yellow, orange, light gray, dark gray, black or Bordeaux.

Star Light is manufactured of specially extruded 400# test HDPE (high density polyethylene) and is available in black only.
