

STAR CASE "OPTIONS"

Recessed Combination Lock - #36(CL)

This recessed combination lock is the most secure and durable combination lock available. It's design is a vast improvement over other conventional combination locks. The entire locking mechanism is concealed behind a recessed steel dish assembly. Any one of a thousand combinations can be pre-set quickly and easily.

#36(CL)

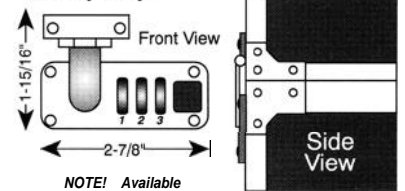

NOTE! Available on Ultra, Super & ATA Star only

Non-Recessed Surface Mounted Combination Lock - #35-(SM)

The surface mounted combination lock is best suited to our light duty Carry Star cases. This surface mount combination mechanism requires a 3/4 inch recess into the case interior. Any one of a thousand combinations can be pre-set quickly and easily.

#35(SM)

NOTE! Available on Carry star only

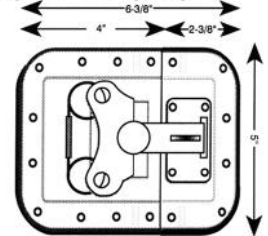

Twist/Hasp Catch

"As a" Substitute" For a Twist Catch(es) - #39(TH)

The twist/hasp catch secures your case with a twist/hasp catch & D-ring strike mechanism. As a "substitute", this twist/hasp catch and D-ring strike is used in place of the standard twist catches. Remember, Style Aclosures need only one twist/hasp catch for security. However, a Style B-3 or B-4 closure would need 2 twist/hasp catches, one on either side for security. Padlock is not included.

#39(TH) or #40(PH)

NOTE1 Available on Ultra, Super & ATA Star only

In "Addition" To a Twist Catch(es) - #40(PH)

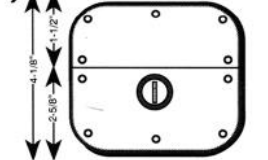

STAR CASE designs all cases with adequate catch placement. If you need additional closure strength the twist/hasp catch can be ordered optionally. This is often used when additional security is required. This additional catch can be positioned between existing standard twist catches.

Recessed Steel Key Lock - #38(KL)

The recessed steel key lock option furnishes your case with an incredibly strong, steel-reinforced, locking option. It's compact in size, surface mounted to guard against damage in transit, and is equipped with a pair of standard keys.

#38(KL)

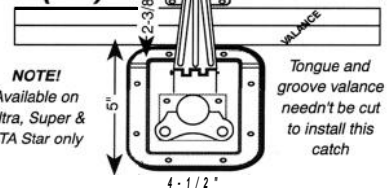

NOTE! Available on Ultra, Super & ATA Star only

Valance-Spanning Catch - #45(VC) additional

Due to the fact that we don't have to rout-out the tongue-and-groove valance to install this catch, it helps insure against moisture and dust seepage into your case. This is our standard catch on military and federal spec. cases.

#45(VC)

NOTE! Available on Ultra, Super & ATA Star only

Tongue and groove valance needn't be cut to install this catch

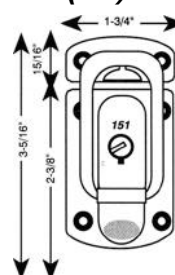

Exterior Catch

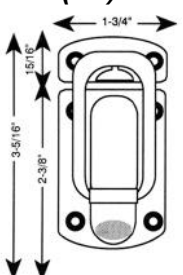

With Key Lock - #37 (5K)

The lockable version of the exterior mounted catch is equipped with a pair of keys and is ideally suited to briefcases, technicians' tool cases, and other smaller, more portable cases. It assures positive closure strength for lighter duty applications in the Carry Star line of cases.

#37(5K)

#42(5E)

Without Key Lock - #42 (5E) additional

The standard, un-keyed version of the exterior mounted catch is available on Carry Star cases only. It assures positive closure strength for lighter duty applications in the Carry Star line of cases.

NOTE! Available on Carry Star only
