

# STAR CASE Generic Product Cases

## ★ Briefcases and Attache Cases

STAR CASE briefcases are equipped with a vinyl fan-fold assembly in the upper section (lid) of the case. The lower section (base) is generally leather lined. You can also specify a simple indoor/outdoor carpet or 1/2 inch polyester foam lined briefcase.

These cases are available in various depths and are excellent as organizational briefcases, software transporters, over-nighters, and laptop or notebook computer cases.

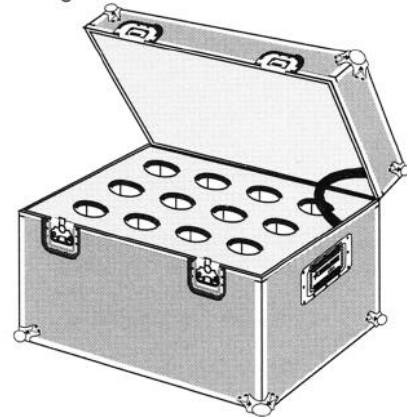

When ordered in Carry Star, briefcases are outfitted with one each key locking and non-locking surface mount catch. Be sure to consider one of STAR CASES locking options on this case.

## ★ Microphone Cases

Microphones come in numerous shapes and sizes. Likewise, STAR CASE microphone cases come in sizes and configurations to handle just about any requirement.

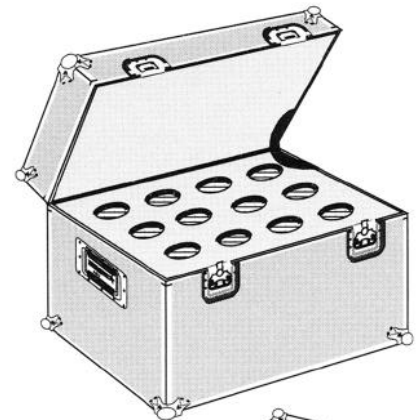

From our basic briefcase size microphone case to our multi-circular cut-out design, you'll find the exact configuration you need. Be sure to consider one of STAR CASES locking options on this case.

## ★ Optical Lens Cases

STAR CASE optical lens cases cradle even the most fragile devices in circular cut-outs of soft, polyester foam.

This design has been used for video, cinema and photographic lens applications, optics for microscopes and telescopes, for fragile vacuum tubes, and just about any requirement calling for singular or multiple separated cut-outs. Be sure to consider one of STAR CASES locking options on this case.

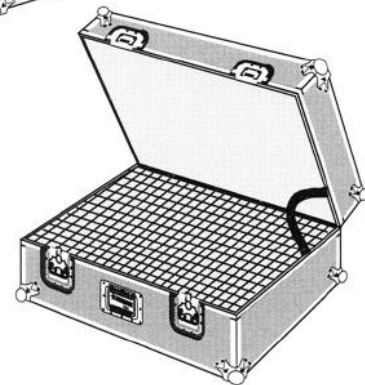

## ★ Photographic Cases

Photographic equipment comes in just about every size and shape imaginable. Our standard sized foam filled photographic cases are perfect for those who want to do their own foam cutting or interior designing.

Foam can be specified as either solid 1 inch polyester (soft) foam layers or 2 inch layers of polyester cubed foam. Cubed foam gives the user the opportunity to "pluck" 1 inch square cubes creating specific sized cutouts.

They can serve a multitude of applications in addition to photographic uses such as small instrumentation, medical supplies, and hand held precision tools. Be sure to consider one of STAR CASES locking options on this case.
