

★ **Technicians' Tool Cases**

Our technicians' tool cases are the perfect solution for heavy-weight tool case applications. With tool cases, more damage typically occurs from the inside out, rather than the outside in, due to the heavy concentrations of weight inside the case.

STAR CASE tool cases are built in all case types and can be equipped with two different variations of rigid-backed tool pallets. The lower section (base) can be ordered with either 1/2 inch foam or indoor/outdoor carpet.

We even offer a model with a tool pallet in the upper section (lid) of the case as well as one in the lower section (base) of the case. Be sure to consider one of STAR CASES locking options on this case.

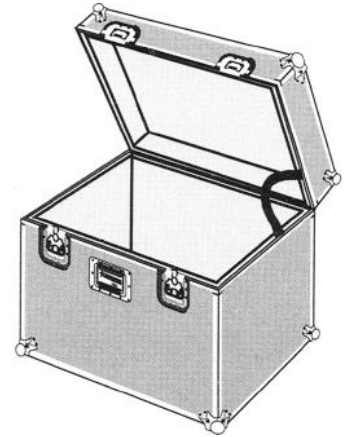

(Model 31 shown in CARRY STAR)
with choice of Pallet #1 or #3

★ **Utility Cases - 1 Inch Foam or Carpet Lined**

STAR CASE maintains designs on hundreds of basic dimensionalized utility case sizes. Simply select the basic set of dimensions (width x depth x height) that best handles your requirements.

One inch foam or carpet lined cases are sized by the interior foam-to-foam or carpet-to-carpet dimensions. They are ideal for miscellaneous trade show sample cases, literature transporters, cable cases, and just about any multi-function case requirement.

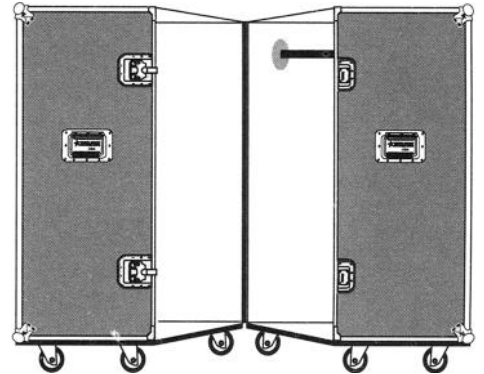

★ **Wardrobe Cases**

STAR CASE wardrobe cases are perfect for professionals having to spend long periods of time away from home. They afford the user the opportunity of multiple drawers (either glide mounted or rail mounted) for organization of clothing and other personal effects. A hanging section opposes the drawer section if so specified with velcro or nylon straps (optional) to keep hanging garments in place while in transit.

STAR CASE wardrobe cases are excellent choices for individuals involved in the fashion and garment industry, allowing safe and worry-free transport of expensive samples and related merchandise.

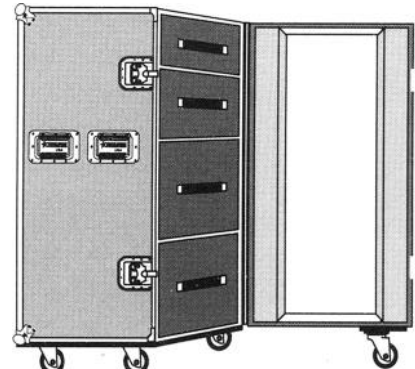

On style E-4 wardrobe cases, casters are highly recommended. In such instances, a 5th caster (optional) is recommended on the bottom of the front section (lid) of case for stability when opening. Be sure to consider one of STAR CASES locking options on this case.

★ **Work Box Cases**

Work boxes are very popular as transportable field work centers offering the user various multi-drawer configurations. Each case is equipped with either roller or rail mounted drawer glides. Drawers are separated by partitions so contents stay in place should case be transported upside down or sideways.

On style E-4 work box cases, casters are highly recommended. In such instances, a 5th caster (optional) is recommended on the bottom of the front section (lid) of case for stability when opening. Be sure to consider one of STAR CASES locking options on this case.
