

STAR CASE "TYPES" and..

All STAR CASE "Types" are constructed to open in a multitude of configurations for the easiest access to your items. We have design engineers on staff to help you select the best protection at a price you can afford.

A full range of interior protection assures even the most sensitive, fragile or valuable items can be shipped safely. Varying grades

of foam lining protect your equipment from the shock that occurs when transporting your valuables by Air, Land or Sea.

There are hundreds of additional internal and external options including, but not limited to, casters for easy moving, locking devices for security and a rainbow of exterior case colors. ☒

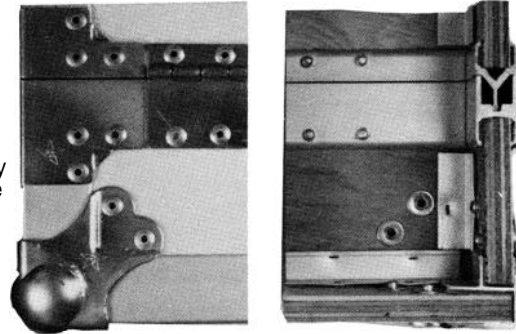

WHEN ONLY THE BEST WILL DO

ULTRA STAR CASES - 1/2"

When your equipment must arrive in optimum working condition, you need The Ultimate in Product Protection. ULTRA STAR by STAR CASE. Choose ULTRA STAR cases when you are transporting extremely large, heavy, or fragile items, or when your case will be subjected to constant abuse from repeated travel.

Some typical applications for ULTRA STAR cases include huge electronic consoles, heavy racks of components, or surface-to-air missiles. For these critical payloads, only ULTRA STAR has the premium 1/2 inch plywood/fiberglass panel construction (double the normal case panel thickness and twice the acceptable minimum level of protection) necessary for safe transport. You have enough to worry about select the best protection value there is, ULTRA STAR; the name to ask for when you need the ultimate in protection. ☒

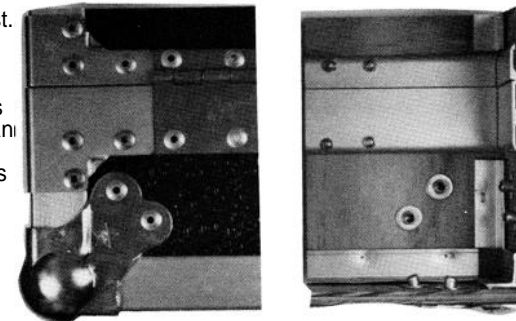

WHEN A BETTER IMAGE IS IMPORTANT

SUPER STAR CASES - 1/4"

SUPER STAR cases are for the demanding professional who won't accept second-best. It's not enough nowadays to just protect your valuables, you need to protect your professional image as well.

Years ago if you showed up for a presentation with your equipment in cardboard boxes you were branded as an amateur. Real professionals wouldn't get caught with less than adequate protection. Today, not much has changed. You still make a favorable impression by how you present yourself. Image is everything! Your professional status is elevated primarily by which manufacturer's logo is emblazoned prominently in plain view. Remember, you only have one opportunity to make a first impression. SUPER STAR cases are the answer!

Transportable component racks, sensitive electronic equipment and priceless artifacts are just a few of the many applications for SUPER STAR Protection. ☒

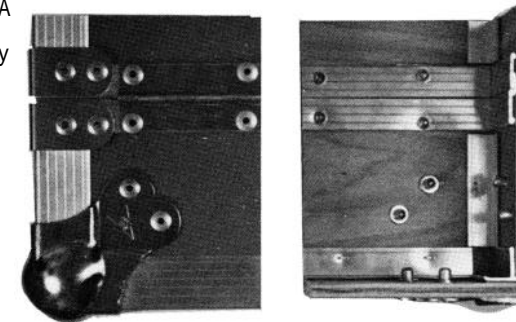

GOOD AFFORDABLE PROTECTION

ATA STAR CASES - 3/8" & 1/4"

When extra product protection isn't as necessary you can enjoy the convenience of ATA (Air Transport Association) STAR cases for all your equipment without having to experience the frustration of budgetary constraints. ATA STAR cases are economically priced, yet offer all the protective features you have come to expect from STAR CASE reusable shipping cases.

ATA STAR cases are available in both 3/8 inch and 1/4 inch construction and are produced to all the exacting ATA standards. ATA Star cases are ideally suited for every-day shipping applications in nearly every field for fragile, sensitive or precision equipment.

You can't afford to replace your valuables everytime you travel. ATA STAR cases let you enjoy all the benefits of owning reusable cases while saving you money at the same time.

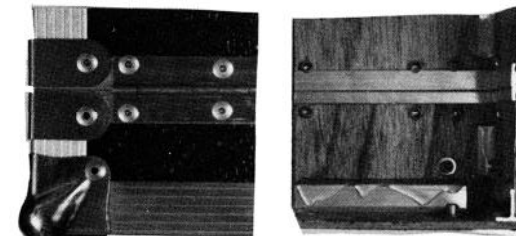

LIGHT DUTY PROTECTION FOR LOCAL SURFACE TRAVEL

CARRY STAR CASES - 1/8"

It's too valuable to leave with someone else. You won't be comfortable unless you have it with you at all times. That's when CARRY STAR cases fit the bill: a personalized, lightweight and sturdy case that will protect your valuables whether traveling by car or van.

CARRY STAR cases are economical, and impressively strong, lightweight carrying cases. They are best suited to general everyday carrying applications and "around town" use. CARRY STAR is an excellent choice for laptop computers, small portable instruments, tool cases, and other lightweight items.
