

# The Ultimate in Product Protection

*Whether you're transporting by Air, Land or Sea, STAR CASES protect everything exposed to shock, vibration and mis-handling. Experience first-hand why no other case protects as well or lasts as long as a STAR CASE.*

*To find out how a Reusable, tested and proven, ATA\* STAR CASE can cost less than a cardboard box, Call for your FREE Factual ATA Case Report.*

\*ATA (Air Transport Association of America) establishes criteria, Specification 300 Category I, II or III, for rating the air worthiness of different types of cases and containers. ATA Specification 300 Category I test procedures simulate 100 airline trips. When put to the test, STAR CASES performance surpasses the criteria established by the ATA.

## AND, THE PRODUCT ITSELF !

- Compare** the superior engineering that goes into every **STAR CASE** hardware fitting.
- Compare** the strength and durability of **STAR CASE** outer Stucco Finish Fiberglass laminate.
- Compare** the thickness of **STAR CASE** metal components.
- Compare** the accuracy of **STAR CASE** design and pricing.
- Compare** the delivery and responsiveness of **STAR CASE** personnel. **We Dare You!**

## CENTRALIZED LOCATION

**STAR CASE** is ideally located in the Northwest corner of Indiana (just south of Chicago) and can deliver cases to you fast and efficiently. No matter where you are in the world, you're as close to **STAR CASE** as overnight air freight, next-day parcel service, or economical common carrier truck lines.

## OUR MODERN CORPORATE HEADQUARTERS

The **STAR CASE** manufacturing facility and Corporate Headquarters is designed for fast and efficient delivery of large as well as small case production runs. Modern, computerized systems track everything from your incoming phone call to the final **STAR CASE** destination. Personalized customer service and support (people dealing with people) is what you'll receive from **STAR CASE**. The most advanced government-approved Quality Control/Quality Assurance procedures, state-of-the-art machinery and production techniques, and **STAR CASE'S** dedicated staff assures that only the finest cases leave our modern facility.

# SUPER STAR

**EXCEEDS  
ATA  
SPECIFICATION 300  
CATEGORY 1**

**SUPER STAR** cases are for the demanding professional who won't accept second-best. Broadcast racks, sensitive electronic equipment and priceless artifacts are just a few of the many applications for **SUPER STAR** Protection.

Similar to **ULTRA STAR**, but lighter in weight, **SUPER STAR** cases are constructed with 1/4" American made Premium Grade plywood laminated to **STAR CASE** Stucco Finish Fiberglass. The **STAR CASE** exclusive deep groove valance assures perfect alignment and extra rigidity. **SUPER STAR** cases are available in all **STAR CASE** colors.

## PLEASE NOTE!

**STAR CASE** also manufactures four additional case lines to fit every product protection price range. (1) **EMBARC STAR** cases exceed all environmental MIL-STD 810 specifications and are available in 3/8" construction. (2) **ATA STAR** cases (available in 1/4" & 3/8" construction) exceed ATA Specification 300 Category 1 requirements and are used primarily for standard duty travel. (3) **CARRY STAR** cases are lightweight (1/8" construction) "carrying" cases, perfect for local surface travel. (4) **EXPO STAR** surface travel cases (available in 1/8" & 1/4" construction) are economically designed with telescopic lid style and nylon belted closure straps and are excellent protection for lightweight exhibit panels and display materials when trade show costs must be kept within a tight budget. Call us for additional information on these popular case lines.

**★ STAR CASE** is better because our features are your benefits !!

### **RECESSED HARDWARE**

Standard on **ULTRA, SUPER & ATA STAR** Cases are spring-loaded, recessed catches & handles. They meet commercial and military standards for durability and are virtually fail-safe in transit.

### **MATING RACK LIDS**

When the shell of the 13" Rack Equipment case is in use, the front & rear lids can mate together to form a separate full strength case that can be used as a storage compartment or platform. State-of-the-art proprietary machinery is used to accomplish this **STAR CASE** exclusive.

### **STUCCO FINISH FIBERGLASS**

**STAR CASE** exclusive Stucco Finish Fiberglass, when laminated to American made Premium Grade plywood, creates a very durable, scuff-resistant case panel. **STAR CASE** Stucco Finish Fiberglass will not bubble, blister, crack, or delaminate due to extreme temperature changes.

### **STEP-DOWN HARDWARE**

Proprietary on **ULTRA, SUPER & ATA STAR** cases, **STAR CASE** corners & catches are stepped to fit snugly around aluminum extrusions. This attention to detail is only part of why **STAR CASE** is the best product protection. When you move, rest on **STAR CASE**.

**STAR CASE EXTERIOR COLORS AVAILABLE**

You need to get your fragile equipment from one location to another.

The carrier tells you that if it isn't packed properly they can't be held responsible.

Your boss tells you that this is the biggest opportunity of your career.

Your stomach tells you if the equipment arrives damaged you'll be job hunting next week.

# ULTRA STAR

## What should you do?

**The Answer is TO USE STAR CASE!  
The Practical, Simple Solution  
For The Best in Product Protection.**

When the item you're protecting is extremely large, heavy, or fragile, or the case will be subjected to constant abuse from repeated travel, **ULTRA STAR** cases are for you. Constructed of 1/2" American made Premium Grade plywood, laminated to **STAR CASE** Stucco Finish Fiberglass, **ULTRA STAR** has the strength to endure the punishment of airline and truck shipments over and over again. **STAR CASE** exclusive deep groove valance assures perfect alignment and positive closure, while **STAR CASE** inner/outer support extrusion insures extra rigidity. Whether it's a grand piano, a huge electronic console, a heavy rack of components, or a surface-to-air missile, **ULTRA STAR** is the name to ask for when you need the ultimate in protection. **ULTRA STAR** cases are available in all **STAR CASE** colors.

**★ STAR CASE** is better because our features are your benefits !!

### DEEP GROOVE VALANCE

Proprietary on **ULTRA STAR** & **SUPER STAR** cases, the extra deep tracking tongue and groove valance (the deepest in the industry) adds superior strength, resists moisture and assures perfect alignment and positive closure.

### VALANCE CLAMPS

Proprietary on **ULTRA STAR** & **SUPER STAR** cases the **STAR CASE** valance clamp fits on and wraps around the **STAR CASE** tongue & groove valance. It connects adjoining case panels, increases the structural strength and extends the useable life of the case.

### INNER/OUTER EXTRUSION

All **STAR CASES** have an inner/outer extrusion that provides both internal and external support to adjoining case walls when compared to the industry minimum standard "L" shaped outer-only support extrusion.

### CLEAR ANODIZED ALUMINUM

Exclusive on **ULTRA STAR** & **SUPER STAR** cases is clear anodized aluminum. Besides making a **STAR CASE** the best looking case in the industry, this protective aluminum coating serves as an effective environmental barrier reducing the development of corrosion.
